

Hose Bed Covers – WHY?

Hose Bed Covers – WHY?

This class is available in two different versions:

- The basic class walks the participants through the incident that prompted the NFPA to require hose bed covers.
- Discusses the NFPA process, the Temporary Interim Amendment issued, changes to NFPA 1901 which have carried forward to NFPA 1900.
- Highlights the changes that took place in fire hose materials and couplings that contributed to an increase in fire hose self-deploying off apparatus.
- Reviews other incidents of hose self-deploying and the results of those incidents.
- Discusses the jury award to the families involved in the incident that prompted the NFPA to require hose bed covers.
- Duration 25-30 minutes.

Expanded Version:

- Includes all the information highlighted above.
- Adds a discussion about the different types of hose bed restraints and covers available including options, pros and cons of different features.
- Duration 45 minutes.
